SKILLS

Programming:

• Java • Python • JavaScript • HTML/CSS
• SQL

Libraries:

• React • Node Js • Express Js • Flask

Tools and Technologies:

• Github • GIT • VS Code • MongoDB •
Jira • Docker • Databases

SAP:

• Ui5 • Fiori • ABAP • OData • BTP •
CAP

CERTIFICATIONS

Generative AI by SAP

AWS Cloud Architecting

Cisco Packet Tracer

Smart Coder by Smart Interviews

The Joy of computing Python - NPTEL

SQL by HackerRank

EXPERIENCE

MINDSET EXPERIENCE INDIA PVT LTD | FULL STACK ASSOCIATE DEVELOPER

March 2023 - Present | Bangalore, INDIA

- Ecolab: Ecolab is the global leader in water, hygiene and infection prevention solutions - helping businesses succeed while protecting people and vital resources. I have worked on the JavaScript frameworks Ui5, React for the Frontend UI and worked on Node Js, CDS for the Backend API Service. Completed all the tasks and deliverables on time while maintaining the quality of code.
- Project AssetWise: I have worked on a full-stack SaaS product called AssetWise. This application is a multi-tenant SaaS solution using a Cloud Application Programming model. The application is hosted by a service provider to serve multiple customers (tenants) sharing the same resources but allowing for the isolation of individual customer's data and configuration. It helps enterprises manage their assets, and it also contains features like chart visualization, attachment upload, mass upload, mass edit, and CRUD operations. Used JavaScript frameworks Ui5, React for the frontend, Node.js for the backend, and S4HANADB as the database.
- Project Assessment Tool: Built a full-stack cloud application for creating assessments and assigning them to employees for internal mock exams using the JavaScript frameworks Ui5, React for the frontend, Node.js for the backend service, and S4HANADB as the database.
- Developed, designed, and tested implementations of JavaScript development projects using Node.js, React, RESTful APIs, ABAP and SAP technologies.

SUNTEK CORP SOLUTIONS PVT LTD | TEACHING ASSISTANT

Nov 2022 - Feb 2023 | Hyderabad, INDIA

- Assisted over 50 students in understanding object-oriented programming in Java.
- Delivered lectures on data structures and design, such as linked lists, stacks, queues, hash maps, and binary search trees to facilitate a greater comprehension of the topic.

PROJECTS

FITCLUB WEB APPLICATION USING REACT | [Link](#)

- Developed Fitness Club page using React Js, HTML5, CSS3, JavaScript and Email.Js.
- This application contains cool animations and is responsive for both web and mobile view.

HEART STROKE PREDICTION APPLICATION (FLASK) | [Link](#)

- Developed a Flask web application to predict heart stroke using a Random Forest Classifier model.
- Used open source data and Python's scikit-learn library to train the Random Forest Classifier model with 93 percent accuracy.

FULL STACK BLOG APPLICATION (MERN) | [Link](#)

- A Responsive Blog Application with user Authentication and CRUD functionality
- Used MERN Stack to build this Application
